## Point-of-Sale Software

If you have a growing retail tire and auto service business with 1 to multiple locations, HITS® M/S tire software might be the perfect fit for you.

- **Online, Real-Time Updating** - Economically connect to locations via the Internet regardless of where you are.
- **Centralized Customer Database** - Control your A/R much easier for all locations from your main office. Invoice a customer at one store and their A/R balance is instantly updated and available at any store. Centralized vehicle tracking makes it possible to service your customers at all locations.
- **Multi-Store Inventory Control** - This includes centralized pricing control, tracking of work-in-progress and transfers for each stocking item at every store.
- Process multiple orders from one screen.
- **Marketing to Customers** - Send customers emails, postcards or even text messages about their vehicle.
- **Quoting Tools** - Quickly offer “Good, Better, Best” packages to customers when quoting to them.

Andreoli understands that we need to earn your business just as you have to earn your customers’ business based on the experience.
